

Boundary Conditions

Start Application

Entry condition

A superuser is automatically created.

Flow of Events

1. The super user is automatically created and logs into the server machine.
2. The super user creates the SCM primary member. If the primary SCM member has been successfully created, they will be able to:
 - a. Create conferences
 - b. Create a second type of SCM user that will only be able to help organize conferences.

Exit Conditions

SCM members, both primary and secondary are created
